## Audit Results: 2017

### Technical Surveillance Counter Measures "De-Bugging"

Advanced Corporate Solutions (ACS), the industry leaders in **Technical Surveillance Countermeasures (TSCM)** and **Electronic Countermeasures Investigations (ECMI)**, is proud to announce and share the results of our **2017 Technical Surveillance Counter Measures Audit**.

External audits are an extremely important component that ensures that we as ACS, remain compliant and relevant in our field of expertise. Maintaining an effective system of internal controls is vital for not only achieving our business objectives, but also to deliver Service Excellence to our valued clients. The 2017 audit was initiated and completed, based on key requirements set forth by our clients in the **financial** and **mining** sector.

The audit was conducted by Dr. Genis J Pieterse (PhD), a well-known, respected thought leader and expert in the field of TSCM, and an associate member of the Espionage Research Institute International. The audit focused on key areas within the specialist field of TSCM, and encompassed the following control areas;

- **Qualifications** • **Operations** • **Equipment** • **Resilience**

The audit was formally completed during September 2017, and it gives is great pleasure to include and share the formal results of the audit with you, our valued clients.
