

Welcome to 2026

**"In a world that listens,
TSCM ensures your voice
stays yours."**

As we enter a year defined by rapid technological change, the importance of protecting your information assets and intellectual property has never been greater.

Technical Surveillance Countermeasures (TSCM) remains a critical safeguard, ensuring your spaces, conversations, and strategies stay secure. We look forward to partnering with you to keep your organisation protected throughout the year ahead.

WE OFFER:

- Comprehensive TSCM sweeps and eavesdropping-device detection, supported by expert consultation and clear, actionable recommendations tailored to your environment.
- To prepare effectively for the year, we would like to schedule an in-person appointment so we can discuss your needs and plan the appropriate countermeasures for 2026. Please let us know your availability, and we will gladly arrange a meeting at your convenience.

Advanced Corporate Solutions

TSCM | "Debugging" Specialists | Service Excellence since 1995

Best regards, Riaan Bellingan and the
