

ADVANCED CORPORATE SOLUTIONS (ACS) CORPORATE ESPIONAGE – SOUTH AFRICA

The threat of Corporate Espionage remains a reality. A regular programme of Technical Surveillance Countermeasures (TSCM) “debugging” is recommended towards ensuring the protection of Company Intellectual Property (IP) and Communication Security.

Advanced Corporate Solutions

TSCM | “Debugging” Specialists | Service Excellence since 1995

We are pleased to announce that our Mobility Enhanced Spectrum Analyser (MESA) was recently successfully upgraded to include enhanced Wi-Fi detection. We would like to thank Research Electronics International (REI) in the USA (www.reiusa.net), for their assistance with the upgrade and support in keeping our **Technical Surveillance Counter Measures (TSCM) “Debugging”** equipment up to date considering the reality of increased global Corporate Espionage and ever-growing sophistication of eavesdropping devices in the market.

Spectrum Analyzer

WiFi

Detects WiFi Access Points and Clients, provides device details

True 6/12 GHz portable Spectrum Analyzer
